WALDEVAR Energy firmly distances itself from the actions under investigation regarding its employee and reaffirms its zero-tolerance policy towards corruption

Bucharest, September 27, 2026

In light of the information appearing in the press over the past few hours regarding the case investigated by the National Anticorruption Directorate (DNA) involving Cristian Theodor Dragomir, employee of WALDEVAR Energy, the company considers it necessary to publicly and unequivocally clarify its position.

WALDEVAR Energy categorically distances itself from any act of corruption, fraud, or other unlawful conduct.

Integrity, fairness, and strict compliance with the law are fundamental principles upon which WALDEVAR has built its operations and development in Romania and international markets. These principles apply to everyone within the organization, regardless of their position.

THE ACT NOW REPORTED IN THE PRESS WAS IDENTIFIED AND DOCUMENTED AS PART OF THE DNA INVESTIGATION

It is important to make a very clear distinction from the outset.

The act of corruption reported by the press in the last few hours was identified and documented within the investigation conducted by the National Anticorruption Directorate, using the means and procedures specific to a criminal investigation.

The company did not participate in the alleged act of corruption and is not a beneficiary of it.

WALDEVAR'S INTERNAL INVESTIGATION BEGAN APPROXIMATELY A YEAR AND A HALF AGO

Approximately a year and a half ago, WALDEVAR's Internal Control Department began reviewing the activity of Cristian Theodor Dragomir, following the identification of irregularities and suspicions regarding actions that could prejudice the company. As the reviews progressed, the company identified elements that it deemed necessary to document with specialized legal assistance.

The company's initiative was based on the irregularities identified through its own control mechanisms and suspicions regarding possible acts committed to the detriment of WALDEVAR.

Following the reviews and with specialized legal assistance, the company notified the competent authorities using the appropriate legal instruments and provided them with the relevant information and documents.

WALDEVAR's internal investigation and the subsequent criminal prosecution activities carried out by the competent authorities must, therefore, be understood as distinct.

The act of corruption currently presented in the press was identified and documented within the DNA investigation. WALDEVAR Energy is not aware of all the details of the investigation and, in any case, cannot disclose the known facts given the non-public nature of the criminal investigation and the respect for the presumption of innocence.

WALDEVAR MANAGEMENT'S POSITION: ZERO TOLERANCE TOWARDS CORRUPTION AND FRAUD

WALDEVAR was built on hard work, fairness, and respect for the law. We will not accept the company's name and the work of the people at WALDEVAR being associated with individual actions contrary to these principles. The moment our internal control mechanisms identified irregularities, we chose the right path: verification, documentation, legal assistance, and notifying the competent institutions. WALDEVAR will continue to fully cooperate with the authorities and provide them with all necessary information. For us, there is no position, commercial relationship, or personal interest that is above the law.

The individual actions attributed to a member of the management do not represent the values, policies, or operational framework of WALDEVAR Energy.

The company enforces a zero-tolerance policy towards corruption, fraud, prejudicing the company, and any other unlawful conduct.

WALDEVAR has strengthened its internal control and compliance mechanisms and will continue to develop them to protect the company, its employees, clients, and partners.

WALDEVAR Energy respects the presumption of innocence. Establishing the existence of offenses and individual criminal liability belongs exclusively to the courts of law.
